TANKOA YACHTS_BOLIDE

Not content with penning the likes of the Gazprom headquarters in Saint Petersburg, Exclusiva Design has now selected Tankoa Yachts as its partner on its first venture into the nautical arena. Progetto Bolide is a 72-metre superyacht radical both in design and in its take on luxury. Three key ideas underpin the futurist-inspired concept which pushes beyond conventional yacht concepts while retaining a bespoke ethic. The first of the cornerstones is the 500 square metres of glass that meld with the steel hull offering unfettered views. The second is superb functionality in the interior space through innovative

solutions and detailing – the owner’s apartment with its private access being a case in point. There are an impressive five VIP suites and a host of transformable spaces. The main swimming pool, for instance, has a rising floor that creates a dancefloor or party area flush with the deck. The third key point is seamless interior-external relationality. Progetto Bolide offers an amazing 1,500 square metres of space – 600 out on deck and 900 under cover. Glass-walled garages reveal two 7-metre tenders, a rescue craft and various toys.
